Oct 18, 1943

Dear Folks,

I haven't much time but I want to let you know mostly about my watch question. If this gets there before Thursday or Friday I would like for Dady to look in Indianapolis for a watch. I am afraid that my green would get broken very easily. A service watch would also have a luminous dial and let me know how the time was coming through the night. For sentimental reasons I would certainly hate to ruin my good watch.

While I am in an asking mood I am going to ask for a few more things. I need another tooth brush

and maybe my old one too (for cleaning my rifle), if it is still around. Two or 3 more hangers; and a few pairs of khaki sov.

I am glad to hear that you got my war bond. I didn't get any pay for last month because it took it all to pay for my allotments. at least I know now that I got credit for it.

I haven't got much news to tell except that we kept busy but didn't work very hard today and that we are going on another short march tomorrow.

I got your airmail letter today but it wasn't a very good measure of time since it might have been held up over the week end. I will watch the dates on future letters so I can let you know for sure about the time.

I hope everything is coming off well
back there. Back on the watch question
don't go a whole lot over the 30 mark
Bed time.

Love
Donald.
