

UNITED STATES ARMY

Tuesday Evening

Dear Folks,

Well I've got a little news to tell you about my ear. It wasn't bothering me any worse than it had but I felt something should be done so I went on sick call today. They didn't do a thing to it so I sure am glad that it isn't too bad. They did give me some drops for it and sent me to the ear, nose and throat clinic. They were so busy over there that they could only give me an appointment for June 5.

I suppose my ear will be well by then and they won't do anything about my throat but at least it will put it on their records so that it will impress it on their minds if any more trouble comes up. I have made up my mind though that if

either ear or throat gives any trouble before
the 5th I'm going to just drop everything
else and go on sick call.

I drilled with the Co. Monday and
like everyone else felt the effects
of furlough. I went to sick call this
a.m. and the clinic this P.M. so today
wasn't very hard. Tomorrow promises to
be a full day. I have table waiter
and also we go to mine school
where we study booby traps, mines
and such explosives. It's just a period of
training which each company must go through.
I don't know for sure about
the radio but I think I'll get
back into it.

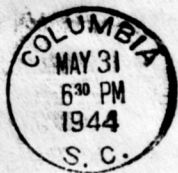

Order this scribbly little letter
but I want to go to bed as soon as
possible.

Love

Donald

Hope to hear from you tomorrow. I got
my dog tags Mon. noon. No one even
knew I didn't have them.
