Hello People,

I don't know how to start this letter. Perhaps after I once do get going I'll think of something to say. I know if I could just remember anything that I have thought about to say in the last couple of days there would be plenty to say.

To start with I'll tell you about the clipping I am enclosing. I don't want to give away any valuable information but I think I can tell you that I was in that very house the morning the town was taken. Of course at the time we didn't know the significance of the house but I know this is the one. We had a company ^(Command Post) CP in the first floor. Just as a matter

Please save
the clipping
for me
Thanks

of interest to you; I
had my radio set up
in the upper right hand window
as you face the house. I later
moved it to the window just
below it (that is the room where
the drug store is located). Also
I remember that the engineers were
using explosives to move a big
tree that had been cut down across
the road to block traffic. One of
the charges blew the shutters off
one of the front windows.

Well we've had it pretty easy
for a while so I expect we'll
be doing something pretty soon.
You can always expect something
when things quiet down a little.
Whenever that time comes when
I can't write for a few days

P.S. We are allowed
to tell you that you'll know the
reason. ~~then~~ ^{the} took
cableing. I got a V mail

I got a V mail from you yesterday but it was older than some of the air mail letters I have received. I was in hopes that it would tell me what Richard found out but it didn't.

I've been pretty lucky in getting to attend church services in the last few days. There were services that I was able to attend both yesterday and the day before. That's like a lot of other things - when we are in a position to have services they try to hold enough to last for a while.

Let's not cease to look up for
His help. The Lord willing we'll be
seeing each other one of these days.
The cure has given me a lot to be
thankful for.

Love
Donald.
